Monthly Emergency Population Release Report June 2008

There were no emergency population releases in June 2008, and jail capacity did not go into emergency population status on any day during the month. January, February, April and May of this year also saw no emergency population releases.

*Red bars indicate days on which EPRs occurred, if any. Note that EPRs do not always or only occur when capacity exceeds the 97% threshold. Efforts are made to balance the population to the demands of the classification system for specific types of jail beds and balance the space needs for male or female inmates. Additionally, jail capacity varies throughout the day, with these capacity calculations based on 10PM population counts.
