Percentage of Capacity by Day

* Red bars indicate days on which EPRs occurred. EPRs do not always or only occur when capacity exceeds the 95% threshold. Efforts are made to balance the population to the demands of the classification system for specific types of jail beds. Additionally, jail capacity varies throughout the day. These capacity calculations are based on 4 AM population counts.

On November 14, 2018, the Multnomah County Board of Commissioners adopted an amended Jail Capacity Management Plan. Renamed the Emergency Population Release Plan, the plan re-states the existence of a jail population emergency when the population exceeds 95% of capacity (1,130) and updates the processes established to resolve the emergency.
